

Just in Case[®] Program

Controller

Are you prepared for the unexpected?

While MTS controllers are known for their reliability and our field service engineers are known for their responsiveness, the unexpected can still bring your testing program to a standstill. MTS understands the impact that a component failure can have on your testing operation. That's why we offer Just in Case, a spare parts solution for your MTS controllers.

Our Just in Case Program allows you to have the peace of mind knowing that if a controller part failure occurs, you can access an immediate solution and keep your testing program on schedule. The kit includes a spare CPU board, associated electronic circuit cards, an optional handset, and power supply.

EASY TO USE

Immediate access to critical spare parts in a single, clearly marked container.

EASY TO REPLENISH

Kits are easy to maintain through well established MTS factory replenishment services using our Return Authorization Number (RAN) process.

MATCHES YOUR LAB CONFIGURATION

Spares reflect your installed base so that if you experience a controller part failure, your staff can access your kit and keep productivity high.

SOLVES CHALLENGES RELATED TO GLOBAL TRAVEL, CUSTOMS, AND TIME ZONES

Where you might have to wait 24 hours or longer for your service engineer to install a replacement controller, with the Just in Case Program you can get up and running immediately after the problem is diagnosed.

be certain.
