

Spare Parts Packages

MTS Criterion® Electromechanical Test Systems

Lab productivity relies on test equipment reliability and availability, and unplanned downtime results in lost testing time. To maximize uptime and make sure your test equipment is performing optimally, MTS offers Spare Parts Packages for our MTS Criterion Test Systems.

Depending upon your uptime requirements, we can recommend a spare parts solution that is appropriate for your testing environment. We have classified parts into categories of critical, important and maintenance parts, and offer spares kits and individual parts so that you can choose the parts strategy that is best for your lab.

Parts that are considered to be critical include items that could result in extended downtime or have a long lead time. Parts that are classified as important include items that could impact uptime or performance. Maintenance parts are items required for routine maintenance of the test system.

Downtime costs time and money, but a proactive approach to maintenance and repair, complete with a spares strategy, will help ensure uptime. You'll also have peace of mind with a plan in place to resolve unexpected issues in a timely manner.

be certain.

Spare Parts Packages

MTS CRITERION	PART NUMBER
Spares Kit – C41.103	100-281-203
Spares Kit – C42.503	100-238-165
Spares Kit – C43.104	100-238-170
Spares Kit – C43.304	100-238-171
Spares Kit – C43.504	100-238-172
Spares Kit – C44.104	100-238-173
Spares Kit – C44.304	100-238-184
Spares Kit – C45.105	100-238-186
